

## **COMPANY SAFETY POLICY**

An important facet of prudent corporate management is the identification of safety issues facing the operations of the Company and the management strategy to limit the potential impact of those issues.

The following is a brief overview of the Company's safety policy.

The health and safety of all personnel at Company projects is of serious and fundamental concern to the Company.

The Company aims to conduct its operations in an efficient and effective way while providing the following.

- A healthy and safe workplace.
- Information on the hazards of the workplace and training in how to work safely.
- Consultation at all staff levels on health and safety matters.

No employee is expected to carry out activities that he/she reasonably considers to be unsafe.

All on-site personnel must be aware that they have a responsibility to work safely and raise health and safety concerns as soon as these arise.

If the Company enters joint ventures, it will ensure that the 'operator' of those joint ventures have suitable health and safety policies in place and a strong track record in the industry.
